WE FEATURE THE NEWEST AND MOST FABULOUS ITEMS FOR MOMS AND TOTS!

today's featured product...

If your tummy could talk, what would it say?

Right now mine would be telling me to stop sampling all the delicious holiday sweets! What I really mean is...When you are carrying the most precious miracle (your unborn baby), what do you think your baby would tell you? Most likely he/she would ask you to remember the time just the two of you are sharing. Preserve the memories in your heart and in a journal. But not just a simple journal, make it a Tummy Talk™.

Tummy Talk™ is my newest amazing discovery; a pregnancy journal like no other. Tummy Talk™ is designed to incorporate all the important phases of your pregnancy (journaling, photo album and memorabilia) in one comprehensive book. Delightfully sectioned with multi-colored tabs, into five chapters (pregnancy stories, doctor's visits, weekly journaling, baby shower and birth details), Tummy Talk™ will organize all the memories that you hold so dear.

The look of Tummy Talk™ is beautiful! It is covered in suede like fabric and accented with a genuine Swarovski crystal. Moms can select from three elegant color options. Each page is illustrated with full color graphics that complement your journaling. And the pages (all 105 of them) are created from a heavy paper stock...no worrying about ink bleed through or flimsy photo displays. Also included are coordinating blank letterhead sheets and three pages of scrapbook cutouts to assist in your creativity.

Angela Horiuchi-Yvkoff and Karen Vardeny (founders of Tummy Talk™) have left no detail overlooked. The characteristics that embody this pregnancy book, uniqueness, distinctiveness and sophistication, are unparalleled. Tummy Talk™ is not only a "must have" for all expectant moms but also a gift of love to your unborn child!

tummy talk

thank you to our sponsor..
